

Retentus ABBy Panniculus Retractor for High Risk Patients

COST-REDUCTION FACTORS

High Risk and Wound Care

The ABBy™ allows more light exposure and air flow, thereby reducing moisture, reducing mechanical stress on the margin of the wound, and providing optimal access to the incisional site for wound care

PACKAGING | PRODUCT

ABBy 5-count case | WE-205-5

ABBy 10-count case | WE-205-10

ABBy+ 5-count case | WE-255-5

ABBy+ 10-count case | WE-255-10

Cases contain individual non-sterile peel packs

Benefits of using ABBy include:

Pre-Op

- Helps to dry moist areas that can promote microbial growth at the incisional site

Post-Op

- Reduced incisional pain
- Use of fewer drugs, i.e., iv pain meds, other pain management, i.e., pain pump and accessories
- Expedites wound healing time
- Fewer infections
- Reduced wound complications (majority occur after discharge)
- Reduction in the use of wound vac products, i.e., KCI, PICO, Prevena, Smith & Nephew
- Can replace abdominal support devices, i.e., binders
- Fewer re-admits
- Patient satisfaction
- Better patient outcome
